

WEAK PROMPT vs STRONG PROMPT

SEE THE POWER OF A GOOD PROMPT

1. WEAK PROMPT

"Generate an image of a shop."

Why It's Weak?

- ❌ Too short and vague
- ❌ No details about style, quality or lighting
- ❌ No environment or mood specified
- ❌ No camera angle or quality defined
- ❌ Result is basic and unremarkable

VS

2. STRONG PROMPT

Generate an ultra-realistic 8K aerial drone shot of a luxurious flagship fashion store inside a modern luxury shopping mall. The shop has a stunning glass facade, premium golden lighting, marble flooring, luxury brand displays, elegant architecture, expensive interior design, beautifully dressed mannequins, luxury cars parked outside, cinematic lighting, HDR, photorealistic textures, depth of field, highly detailed reflections, professional architectural photography, vibrant colors, and a premium lifestyle atmosphere.

Why It's Strong?

- ✅ Very detailed and specific
- ✅ Mentions quality, lighting, angle, materials, mood & more
- ✅ Creates a clear vision for the AI
- ✅ Results in a stunning, high-quality, professional image
- ✅ Much more engaging and impressive

🏆 **CONCLUSION:** A strong prompt gives powerful results!
